

SOWA™ Disc Over 360° Slip Ring is the cornerstone of seamless power and data transmission in advanced robotic and machinery systems.

Entirely customizable based on preferred size and power capacity, the *Disc Over 360°* enables uninterrupted communication between rotating and stationary components, ensuring smooth and silent operation, cost-efficiency and optimal performance.

Product Specifications

SPECS

- Compact Design
- Mark I: 28 cm diameter, 6 cm thickness
- Silent operation
- Scalable per preferred diameter / channel quantity
- Low acquisition and maintenance costs
- Supports 8-channel ethernet
- Able to bear high power levels
